J. B. POCKETT

"Cowley" Nurseries

Healesville, Victoria

Sole Distributor in Australia THOS. W. POCKETT NOVELTIES
Healesville, Victoria

Introduction

"Cowley" Chrysanthemum Nurseries,
Healesville, Victoria.

June, 1942.

I have to thank my numerous customers for their patronage and recommendation in the past and to state that owing to the present restricted period and the uncertain times through which we are passing it has been necessary to forego the publication of my usual illustrated catalogue, and in its stead to issue an abbreviated list.

No trouble is too great to ensure the best stock obtainable, which is amplified by the numerous letters from successful exhibitors throughout the Commonwealth.

To avoid disappointment, kindly place your orders with me as early as possible. All orders are sent out in strict rotation at the proper time, unless advised to the contrary.

Suffice it to say nearly every exhibition variety in Australasia has been raised by Thos. W. Pockett, senr., which is a sufficient guarantee of quality.

To further the interest in this Australian achievement, and assist in raising even the present high standard, kindly send DIRECT to the SOLE Distributor in Australasia—

J. B. POCKETT,
"Cowley" Chrysanthemum Nurseries,
Healesville, Victoria.

Clients requiring them for Exhibition purposes, by mentioning same, can have plants from cuttings, which will be less liable to suckering.

*Signifies varieties raised by **THOMAS W. POCKETT, SENR.**
(The Pioneer Raiser), **HEALESVILLE, VICTORIA.**

NOTICE

Pockett's Chrysanthemum

I, Thomas W. Pockett, of Chrysanthemum fame (late of Malvern, Victoria), the raiser and originator of the "Pockett" Chrysanthemums (so well known in the world since 1884), beg to state that my Chrysanthemum Novelties are distributed by my son, J. B. Pockett, Healesville, Victoria, who is sold distributor in Australasia.

(Signed) **THOMAS W. POCKETT,**
Healesville, Victoria.

Nursery closed Saturday Afternoons and Sundays.

New Exhibition Varieties

- ***LADY BEAUREPAIRE.**—Bright red with dull gold reverse and narrow whorled petals. Of medium height and nice growth. First crowns best for exhibition. 3rd-12th February. 5/- each.
- ***MARION AUSTIN.**—Reddish amber with lighter reverse. A semi-incurved that is large enough for exhibition, and ideal for florists, all flowers coming perfectly full. The plant is dwarf, consequently, plants should make a natural break in December, and buds selected from that break for exhibition. 5/- each.
- ***JOAN COMEADOW.**—An immense large white, heavily marked lilac, tall grower and a good keeper. This is best from the first crowns obtained from the natural break in December. 5/- each.
- ***ELSIE JONES.**—An extra dwarf primrose of incurving type being at its best in June. Owing to its late flowering and fine quality, it is well worth taking the same care as required for growing exhibition blooms. 5/- each.
- ***MRS. E. INGRAM.**—Salmon buff. Broad whorled petals with golden buff reverse; dwarf grower. This is one of the largest exhibition varieties and is best from early buds selected from February 3rd. 5/- each.

New Decoratives

- ***MRS. MILTON GRAY.**—Lemon: beautifully incurved, very free flowering and suitable for exhibition, garden or decorative work. It can be grown with two dozen good 4½in. blooms per plant, or

*Signifies varieties raised by **THOMAS W. POCKETT, SENR.**
(The Pioneer Raiser), **HEALESVILLE, VICTORIA.**

otherwise if not disbudded it is good in sprays. Flowering from middle of April. 5/- each.

***OLIVE LUCAS.**—Mauve pink: a very nice decorative that, when disbudded, will give 5in. blooms suitable for exhibition or decorative work. Flowering from middle of April. 5/- each.

***LORNA.**—Rosy amaranth with faint gold tips on opening. This is quite distinct and has full flowers without disbudding. Flowering from the middle of May until the end of June. 2/6 each.

Chrysanthemum Novelties for 1942

EXHIBITION VARIETIES.

***L. J. ADAM.**—Salmon red with silvery reverse. Select buds early in February. 2/- each.

***H. FURLONGER.**—Pink with rather narrow reflexing petals, and perfectly full from buds selected 10th to 20th February. 2/- each.

***W. MILLAR.**—Rosy amaranth with silvery reverse. Any bud after 10th February. 2/- each.

***E. WILKINSON.**—A distinct cream incurved. Select buds about 7th February. 2/6 each.

New Incurved or Decorative

***ELVIE POCKETT.**—Golden yellow with greeny centre. Select buds after first week in February. 2/- each.

***MRS. SIDNEY MYER.**—Golden amber incurving decorative, about 6in. in diameter. A June flowering variety. Select buds after March. 2/- each.

New Decorative

***MARY NEWTON.**—White free flowering and of reflexing type, flowering from middle of April. 1/6 each.

Small Decoratives

***WILMA.**—Reddish amaranth, flowering middle of May onward. 1/6 each.

***JOAN.**—Pink with white tipped petals. 1/6 each.

Giant Anenome

***HERBERT DICKENS.**—Rich amber. The largest anenome we have raised, the cushion being fully 6in. in diameter. Select buds after 12th February. 1/6 each.
